Title: Listen Easy with Bellman

Help dad hear the TV this father's day without the volume turned up to full ball, with the Bellman Audio Maxi©.

Designed in Sweden and distributed in Australia by Tunstall Healthcare, the world's leading provider of telehealthcare, the Bellman Audio Maxi can improve hearing in everyday life.

The Bellman Audio Maxi has an inbuilt microphone that picks up and amplifies sound using digital technology.

The sound is clarified, amplified and background noise removed before being passed through the headphones for clearer better sound.

The Bellman Audio Maxi is great for talking one on one to amplify sound, when dining out or in meetings to block out background noise, when driving to hear the people in the back and when watching TV at a normal volume.

When watching TV, the Bellman Audio Maxi can be connected to the television to provide sound in full stereo.

The wearer can even mute the TV sound provided by the Bellman Audio Maxi to hear conversation around them without having to remove their listening device.

The Bellman Audio Maxi can be used with headphones for easy use, earphones for discreet use or the neck loop for use with a hearing aid.

For \$264 plus \$15 postage and handling, dad never has to miss a conversation again with the Bellman Audio Maxi.

To order a Bellman Audio Maxi call 1300 760 333, or visit www.tunstallhealthcare.com.au for more information.
